

Mark Craig
Senior Strategy Analyst

21 December 2018

Dear Mark,

Corrections to NEP3

Following the release of NEP3 by NRW on 28th March 2018 I am writing to list changes to the programme that have since been identified.

NEP4.1 Unique ID	NEP 3 Scheme name	Change Required
7CST0136	WELSHPOOL STW	Change WFD_IMPgU_IMP2 driver from red Amber to Green following SAE designation in England.
7CST0111	GUILSFIELD STW	Amend environmental outcome calculation to 7.8km to the confluence with the River Severn. Confirmed by email from Richard Cadwaladr 10/09/18
7CST0123	MONTGOMERY (STW)	Amend environmental outcome calculation to 4.4km to the confluence with the River Severn. Confirmed by email from Richard Cadwaladr 10/09/18
7CST0107	CHURCH STOKE (STW)	Amend environmental outcome calculation to 19.3km to the confluence with the River Severn. Confirmed by email from Richard Cadwaladr 10/09/18

It is not our intention to issue another version of the PR19 NEP until AMP7 commences so the changes should be made during AMP7 delivery via the usual change process.

In the new year we also want to discuss the deadlines against schemes to ensure that the delivery profile meets both local and strategic needs.

If you have any queries or wish to discuss this matter in more detail, please do not hesitate to get in touch with Mark Squire.

Yours sincerely

Gill Lennox

Water Quality Technical Specialist
